# 11 Licenses

---

## 11.1 Overview

Typically the licenses listed for the project are that of the project itself, and not of dependencies.

## 11.2 Project Licenses

### 11.2.1 GPL-v3.0

GNU GENERAL PUBLIC LICENSE  
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of

## 14 Source Code Management

---

### 14.1 Overview

This project uses [Git](https://git-scm.com/documentation) to manage its source code. Instructions on Git use can be found at <https://git-scm.com/documentation>.

### 14.2 Web Browser Access

The following is a link to a browsable version of the source repository:

```
https://github.com/hazendaz/winscp
```

### 14.3 Anonymous Access

The source can be checked out anonymously from Git with this command (See <https://git-scm.com/docs/git-clone>):

```
$ git clone --branch winscp-5.21.6 ssh://git@github.com/hazendaz/winscp.git
```

### 14.4 Developer Access

Only project developers can access the Git tree via this method (See <https://git-scm.com/docs/git-clone>).

```
$ git clone --branch winscp-5.21.6 ssh://git@github.com/hazendaz/winscp.git
```

### 14.5 Access from Behind a Firewall

Refer to the documentation of the SCM used for more information about access behind a firewall.

## 16 Team

### 16.1 Project Team

A successful project requires many people to play many roles. Some members write code or documentation, while others are valuable as testers, submitting patches and suggestions.

The project team is comprised of Members and Contributors. Members have direct access to the source of a project and actively evolve the code-base. Contributors improve the project through submission of patches and suggestions to the Members. The number of Contributors to the project is unbounded. Get involved today. All contributions to the project are greatly appreciated.

#### 16.1.1 Members
